

BENCHMARK PROJECT MANAGEMENT (UK) LTD – CASE STUDY

Title

South Bristol Crematorium – Tarmac Ulti-Colour® macadam

General Scope:

Work included:

- Surveyed existing plot setup and mirrored design onto the new proposed area enabling further construction phases
- Supplying and installing Tarmac Ulti-Colour® Buff Quartzite macadam to correct levels and ground contours
- Worked closely with Bristol City Council to ensure maximum area coverage within their tight budgetary restraints
- Working with careful consideration to mourners who are visiting site to pay respects to loved ones.

Dates:

June / July 2019

Client:

Bristol City Council

Value:

£60,000.00

Innovation:

- Bristol City Council approached us for the second time following our previous install in 2017 to further extend their crematorium plots. Just as in 2016 we set-out the site and installed buff coloured tarmac to the crematorium plot paths. The result is a hardwearing and aesthetically pleasing web of footpaths that fully complement the contemporary style of the crematorium.

Customer Satisfaction:

“Great attention to detail”

Bristol City Council – Program Delivery Coordinator
